- Defect Reduction and tracking via code reviews and process improvement recommendations.

### Benefits to our Clients

- **Cross Team engagement** improving efficiencies
- **Code quality** improving customer trust
- Lower Defects and downtime improving **reliability**
- Manage Supplier AQL and KPI **minimizing contract risks**
- Lower Overall Cost to **Deliver Value** by improved performance
- **Plug 'n' play** into new and existing software programs

# Brief Summary of J3's SETA and Agile Support Services

In today's fast-paced and ever-evolving technological landscape, government agencies are always seeking ways to improve operations, save money, and better serve constituents. System Engineering Technical Assistance (SETA) support and services are crucial to helping government agencies meet these goals because they provide agencies with the technical expertise and support needed to successfully complete their projects on time, within budget, and to the desired level of quality.

J3's mature SAFe® Agile processes and robust data analytics, our team is enabling our clients to make economically-based, data-driven decisions; enhance quality, processes, and customer satisfaction; and continuously achieve sustained excellence. SETA services ensure software products, regardless of contract vehicle or vendor delivering artifacts, support a single vision of our Stakeholders' end-state and present a unified product to end-users.

J3's services stack incorporates the aggregation, interpretation, analysis (quantitatively and qualitatively), and visualization of complex data sets in their native (raw) form across our client's service ecosystem. Thus, providing the ability to holistically measure all relevant program performances against the business value (BV) to ensure all such programs are viably meeting BV objectives, whether strategically, economically, qualitatively, technically, tactically, and/or operationally - to continuously deliver value to customers.

Our emphasis on collaboration, coaching, and real-time input highlights a commitment to ongoing improvement and adaptability to changing circumstances as well as a guarantee of the continuous flow of information across all stakeholder groups and as necessary, ensuring accountability and transparency.

## At J3, We find the *WHY!*
